Breeder/Farmer

Popes Jameson is an exciting Simmental bull that combines a proven pedigree with outstanding performance. His dam is the full sister to the Cogent great Popes Barclay . Barclay was exceptionally easy calving and produced progeny that were fleshed and displayed exceptional development from an early age. With a calving EBV of +2.6 and performance figures ranking in the top 10% of the breed, Jameson has the credentials to be the ideal bull for UK dairy farmers looking to use a Simmental sire.
