Breeder/Farmer

Surumu is a great example of the Wagyu breed. This phenotypically correct young bull is sired by World K's Shigeshigetani 1593, renowned for his extraordinary EBVs, specifically his Eye Muscle Area ranking in the top 1% of the breed. Surumu shares this ranking, with an EBV of +13.2 for Eye Muscle area (cm²). With impressive rankings for both Marble Score and Retail Yield, Surumu is sure to produce progeny with consistent carcass traits. All this whilst maintaining Gestation Length and Birth Weight EBVs in the top 20% and 5% of the breed respectively, making this bull an easy choice for Signature Beef and Beef Impact customers alike.
