### Breeder/Farmer

We purchased Lennon from the Wirruna Spring bull sale in 2018. Lennon stood out to us from moment we saw him because he displays an exceptional phenotype. His outstanding muscle development and conformation is supported with an Eye muscle area EBV of +7.9 ranking him in the top 1% of the Australian breed. Lennon carries all the carcase and production traits plus 200, 400, & 600 days weights in the top 10% of the Australian breed. With his above average calving figure of +2.6 and his muscle structure we expect this modern-day Herford to fit the modern-day UK market competing with continental cattle. This outcross pedigree also carries an IMF of +1.4 providing both carcase yield and carcase quality.
