Sire: CDI Secret Agent 407C
AI Code: ST0945

Dam: Lorenzen Rossi Takeover E4

MGS: LSF TBJ Takeback 4856B

Ear Tag: UK220207/202194

✓ Female sexed ✓ Maternal

Breeder/Farmer

Wolfgang is a great example of a Stabiliser bull. He is sired by CDI Secret Agent, an animal that has been heavily used in the US, and for very good reason. He has unique proofs in the US with outstanding calving ease and is loaded with muscle in a moderate package. Wolfgang is able to do it all, he has a low EBV for Birth Weight and as such is suitable for use on heifers. He will produce animals that will grow quickly, his heifers will be fertile with good levels of milk, ideal for replacements, and his finishing offspring will produce outstanding carcass quality. He is in the top 10% for feed intake, meaning his offspring will eat less while still delivering great levels of performance. This bull can help to reduce your feed requirements and lower the carbon footprint of your farm.
