AI Code: ST0946

Dam: Rempe Stabilizer 6120

MGS: WBF Rest Easy U085

Ear Tag: UK142374/502988

Breeder/Farmer

Weighton Wold Warrick is the first Stabiliser bull to be released for the 2022 breeding season. This homozygous polled bull is a son of the hugely successful Leachman Decree and is a perfect example of a modern, profitable and sustainable suckler sire. He has a very enviable set of figures with a low birthweight, yet with weaning and yearling weights in the top 10% of the breed. Warrick has the best feed efficiency of any bull that we have ever collected, his "off the chart" feed to gain will deliver offspring that will convert feed to live weight better than any other semen available. His offspring will grade extremely well, with a massive rib eye area and outstanding marbling, if you are wanting calves to be born easily that grow quickly with great grading potential, Warrick should be the sire to use.
