✓ Female sexed ✓ Maternal ✓ Conformation

Breeder/Farmer

Chapelton Pioneer is an exceptional new addition to our new Signature Beef line up. This exceptional polled sire offers a nice package of quality proven genetics. His exceptional length and style is supported by outstanding conformation while carrying no myostatin genes. His sire has produced sons up to 14,000 gns and his maternal line needs no introduction originating from the exceptional Duchess cow family. We expect this bull to add length and size without compromising on conformation and with a Milk figure of +10 he will be a sire to produce great replacements.
